MODEL ESH-4

Equipment Screen • 4" Deep • 45° Inverted Angle Blades • Sight Proof • Extruded Aluminum

Page 1

Standard Materials and Construction

FRAME: .081" thick (nominal) extruded aluminum 6063-T52/T6 alloy. **BLADE:** .081" thick (nominal) extruded aluminum 6063-T52/T6 alloy.

Available as .125" thick (nominal). Blades positioned at 45°

angle, spaced approximately 4" on centers with architectural

hidden mullions.

SUPPORTS: Incorporated rear angle 2" x 2" x 1/4" extruded aluminum blade

support to withstand windload of 20 PSF, approximately 90 mph wind. Supports vary as required, per wind load.

Spaced on 60" centers.

FINISH: Mill

Options

Variations - Mitered Corner, Post Corner, Hinged Access,

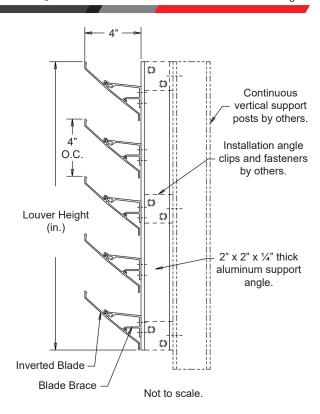

and Cap Covers.

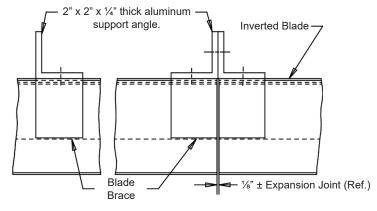

Finishes - Kynar, Baked Enamel, Clear and Color Anodize

(Consult the factory for details.)

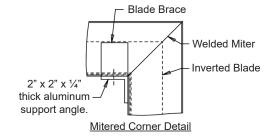

Notes

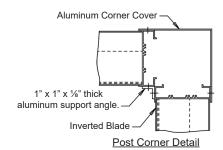

- 1. Maximum size should not exceed 60 sq. ft. or 120"W x 72"H. Louver sections larger than the factory maximum size will require field assembly of smaller sections
- 2. Approximate shipping weight is 4.5 lbs./sq.ft.
